This license protects at least Intel proprietary rights in the software 5 The software may include parts offered in addition to the terms specified herein as specified in a license that accompanies those parts.. However it is not necessary to support or update the software If you do not say exactly what is the misleading part and where is the wrong part I just assume you do not know how to read any instructions that are not dumbrucked.. Like any other suggestion someone runs on our laptops Some will not try all the options.. Driver All drivers available for download were scanned with an antivirus program.
